(54) Title: ELECTRONIC INFORMATION CARD FOR RETRIEVING FINANCIAL INFORMATION

FIG. 1

(57) **Abstract:** An electronic information card for re-  
trieving information pertaining to a banking account of a  
user is disclosed. The electronic information card com-  
prises a casing having a front surface and a rear surface,  
a payment chip and a memory chip located inside the  
casing, a touch keypad located on the front surface, a  
display screen located on the front surface and an activ-  
ate button located on the front surface. The payment  
chip initiates transaction between the user and the trans-  
action terminal. The memory chip allows the user to ac-  
cess financial services such as checking account balance,  
checking monthly expenses, checking transaction in-  
formation in an offline mode by navigating through the  
touch keypad. The display screen displays information  
pertaining to the banking account when a user navigates  
through the touch keypad. The electronic information  
card provides an enhanced security to the user while  
making online transactions.
