(54) Title: PROCESS FOR PREPARING COATED ARTICLES		
(57) Abstract A process for preparing a coated article which includes the step of electromotively coating an article molded or extruded from a composition having a conductivity of at least 10^{-14} Siemens/cm (S/cm) comprising: (a) a thermoplastic polymer, thermoset polymer, or mixture thereof and (b) an electronically-conductive charge transfer complex or inherently semi-conducting polymer different from (a). It has been discovered that the process of the invention provides a means by which electromotively-coated polymer articles may be conveniently prepared.
