Declarations under Rule 4.17:

- as to applicant's entitlement to apply for and be granted a patent (Rule 4.17(ii))

(54) **Title:** PORT COMPRISING A HOSE BARB AND AN ELLIPTIC BODY

(57) **Abstract:** A biopharmaceutical flow port, a biopharmaceutical liquid container assembly, and a method for manufacturing the biopharmaceutical flow port and the biopharmaceutical liquid container assembly are described. The biopharmaceutical flow port includes a hose barb coupled to an elliptic body. The hose barb includes a bore. The elliptic body includes a flow passage, a first edge, and a second edge. The flow passage is fluidly coupled to the bore. The first edge extends from the elliptic body away from the flow passage in a first direction and the second edge extends from the elliptic body away from the flow passage in a second direction opposite the first direction. The biopharmaceutical liquid container assembly includes a biopharmaceutical liquid container with an opening and the biopharmaceutical flow port coupled to the biopharmaceutical liquid container within the opening and in fluid communication with a volume of the biopharmaceutical liquid container.
