(54) Title: METHOD AND SYSTEM FOR FACILITATION OF WIRELESS E-COMMERCE TRANSACTIONS

(57) Abstract: A method for facilitating a wireless transaction includes receiving, by a transaction fulfillment system, a transaction request from a transaction requester and verifying an identity of the transaction requester. After verifying the identity of the transaction requester, a transaction code is communicated from the transaction fulfillment system to a wireless communication device. After receiving the transaction code, the transaction code is optically scanned from a visual display of the wireless communication device by the transaction fulfillment system.
