(54) Title: MODULAR CONSTRUCTION FOR INSTALLATION OF DECORATION

Fig. 16a

(57) Abstract: The object of the invention is a modular construction for installation of decoration, in particular a film exterior decoration simulating a real structure. The modular construction comprises a supporting construction (15), wherein the supporting construction (15) comprises at least one fastening element for fastening the supporting construction (15) to the object (11) and/or at least one support element for propping the supporting construction (15) up against a solid substrate. The modular construction further comprises at least one frame (1) for carrying a decoration piece (3) removably attachable to the supporting construction (15), wherein the supporting construction (15) comprises at least one guide profile (17). Each frame (1) comprises at least one travelling mechanism (4) slidingly movable on the guide profile (17), wherein this frame (1) is slidingly movable relative to the supporting construction (15) via the travelling mechanism (4) and the guide profile (17).
