

ABSTRACT

A SYSTEM SUITABLE FOR DETECTING AN IDENTIFICATION CARD, AND AN APPARATUS AND A PROCESSING METHOD IN ASSOCIATION THERETO

5

There is provided an apparatus which includes a processor. The processor includes a capturing device that can capture data associated with an Identification (ID) Card which is associated with a customer, captured data being processable by a deep learning algorithm so as to obtain general predictive information concerning the ID
10 card. The processor further includes a processor that processes the general predictive information for targeted determination of information concerning the ID card.
