(54) Title: PUSH TRANSFER TO BLOCKCHAIN SYSTEM

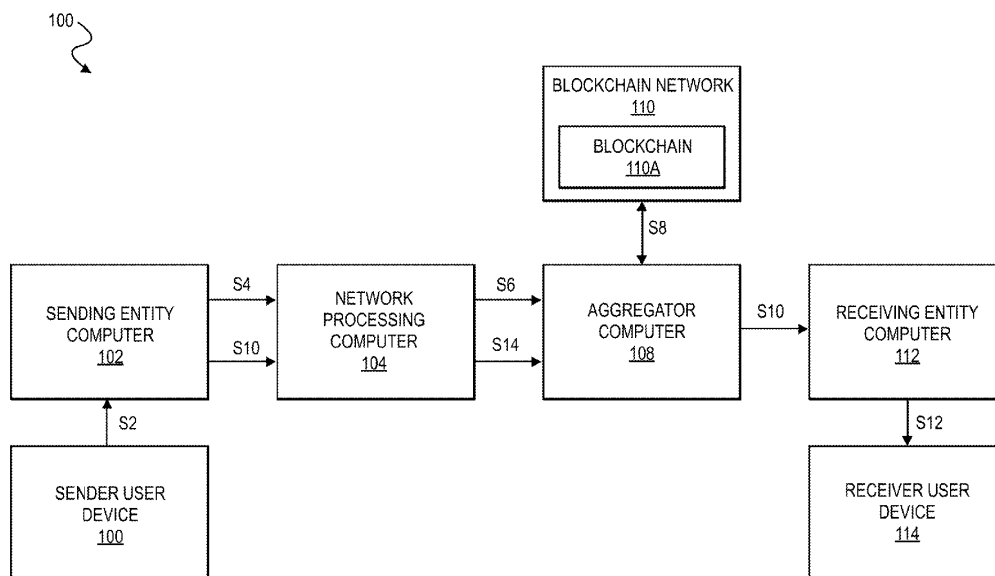

FIG. 1

(57) Abstract: A method is disclosed. The method includes receiving, by a network processing computer from a sending entity computer, a push transfer message for a push transfer. The push transfer message includes a receiver address associated with a record of a receiver and a value. The method further includes validating the push transfer message; and transmitting, to an aggregator computer, the push transfer message. The aggregator computer thereafter initiates a recordation of a transfer the value from an aggregator address associated with the aggregator computer to the receiver address on a blockchain managed by a blockchain network.
