ABSTRACT OF THE DISCLOSURE (FIG. 1)

5 "POSITION INFORMATION PRESENTATION DEVICE,
POSITION INFORMATION PRESENTATION METHOD
AND PROGRAM TO PRESENT POSITION INFORMATION"

A position information presentation device
comprises a position information acquisition part which
acquires position information indicated by a latitude
and longitude or an address on a portable terminal, an
10 information inspection part which retrieves inspected
information, and to present information in which
inspection is requested for the portable terminal,
a position associated information memory part which
memorize a title or a content of information presented
15 by the information inspection part as a position
associated information by associating with the acquired
position information, a position associated information
readout part which reads the position associated
information corresponding to information which should
20 be presented from the memorized position associated
information as a key of the title or the content of
the information, and a position associated information
presentation part which presents position information
which is included in the read position associated
25 information as map information.
