(54) Title: SIGNALING OPTIMIZATION IN 3GPP ANALYTICS

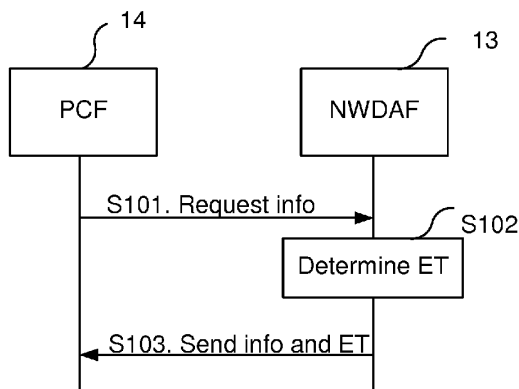

Fig. 2

(57) Abstract: The invention relates to methods of providing requested network information from a first core Network Function (NF, 13) to a second NF(14), and devices performing the methods. In an aspect, a method performed by a first core NF entity (13) of providing requested network information to a second NF entity (14, 15) is provided. The method comprises receiving (S101, S201, S301) a request to obtain the network information originating from the second NF entity (14, 15), determining (S102, S202, S302) an expiry time stipulating how long the requested network information is valid, and transmitting (S103, S203, S303), towards the second NF entity (14, 15), the requested network information and the expiry time.
