A SHOE SOLE STRENGTHENER

ABSTRACT

The present invention relates to a shoe sole strengthener adapted to strengthen connection between a shoe sole and a main body of a shoe comprising a first connecting means (10) extending lengthwise at toe region of the shoe to cover the connection area between the shoe sole and the shoe main body, and a fastening means (20) to attach the first connecting means (10) to the shoe sole and the shoe main body. The first connecting means (10) acts to hold the shoe sole and the shoe main body together and strengthens the existing bond between them. The present invention is applicable to heel region of the shoe.
