(54) Title: MODULE FOR CHEMICALLY PROCESSING A SUBSTRATE

Fig. 1a

(57) Abstract: The invention relates to a module for chemically processing a substrate, a method for chemically processing a substrate and a use of a module for chemically processing a substrate and in particular a large substrate. The module for chemically processing a substrate comprises: an immersion chamber, a spray unit, and a motion unit (14). The immersion chamber is configured to receive a first liquid and the substrate, so that the substrate is immersed in the liquid. The spray unit comprises a plurality of spray nozzles, which are configured to spray a second liquid within the immersion chamber. The motion unit is configured to provide a relative motion between the substrate and the spray unit.
