(54) Title: A FORMS DEVELOPMENT PLATFORM

(57) Abstract: A forms development platform (10) for developing forms, comprising: an attribute design module (22) to graphically design reusable form attributes (81) from a selection of predetermined fields, the attributes (81) having integrated business logic; a form design module (23) to graphically design reusable forms (84) using the form attributes (81), the forms (84) having integrated business logic; and a project design module (21) to design reusable projects (86) by graphically arranging the forms (84) according to a predetermined process flow; wherein the design modules (21, 22, 23) operate independently from each other such that the design of the attributes (81), forms (84) and projects (86) are separate functions, and designed attributes (81), forms (84) and the projects (86) are stored as separate entities.
