(54) Title: CRIMPED CENTER CONDUCTOR

(57) Abstract: A center conductor (30) for use in a coax jack module assembly (60), for example. The center conductor including a conductive body (32) having a crimped region (50) and an uninterrupted region. The crimped region being located only within one of a first half (40) and a second half (42) of the conductive body. The first half and the second half of the conductive body being defined by a plane, which is defined by a central axis (A-A) of the conductive body.
