(54) Title: A FAN ASSEMBLY

(57) Abstract: A fan assembly (10) for creating an air current, the fan assembly (10) comprises a nozzle (14) mounted on a base. The base comprises an outer casing (16), an impeller housing located (64) within the outer casing (16), the impeller housing (64) having an air inlet (70) and an air outlet, an impeller (52) located within the impeller housing and a motor (56) for driving the impeller to create an air flow through the impeller housing. The nozzle comprises an interior passage (86) for receiving the air flow from the air outlet of the impeller housing and a mouth (26) through which the air flow is emitted from the fan assembly, wherein a flexible sealing member is located between the outer casing (16) and the impeller housing (64).
