ABSTRACT

PHARMACEUTICAL COMPOSITION COMPRISING TSL-1502M AND USE THEREOF

A pharmaceutical composition containing TSL-1502M and the use thereof, wherein the pharmaceutical composition is a compound pharmaceutical composition composed of compound TSL-1502M and temozolomide or irinotecan. A method for preparing the pharmaceutical composition comprises using an effective amount of TSL-1502M and an effective amount of another antitumor drug together or separately as a pharmaceutically active ingredient, to prepare a pharmaceutical composition for administration according to conventional techniques in pharmaceutics, wherein the dosage form thereof comprises an injection. The use of TSL-1502M in combination with other drugs is studied, and the results show that the use of TSL-1502M in combination with temozolomide, 7-ethyl-10-hydroxycamptothecin, irinotecan, and topotecan has a synergistic effect.
