

DATA STORAGE AND RETRIEVAL

ABSTRACT

5

A method of storing data on a track of a storage disk, a method of retrieving data on a track of a storage disk, and a controller system for a storage disk drive. The method of storing data on a track of a storage disk comprising the steps of: storing the data in a first zone of the track; identifying errors in the stored data; and

10

storing information associated with the identified errors in a second zone of the track.
