TURES

FIG. 1

(57) Abstract: Systems and methods for a financial transaction between mobile device that include identifying a second mobile device associated with a recipient of a financial transaction to be conducted with a first mobile device associated with a sender of the transaction; enabling the sender to initiate the transaction from the first mobile device via a hand gesture on the touchscreen of the first mobile device to transfer an amount of money specified by the sender to the recipient; presenting visually the transaction from the first mobile device on the screen of the second mobile device associated with the recipient; accepting request for the financial transaction and processing the financial transaction by financial institutions; and updating relevant financial records related to the sender and the recipient, respectively once the financial transaction is cleared by the financial institutions.
