(54) Title: METHOD AND SYSTEM FOR REALIZING INTERCOMMUNICATION BETWEEN DIFFERENT PAYMENT OPERATIONS

(54) 发明名称: 一种实现不同支付操作互通的方法及系统

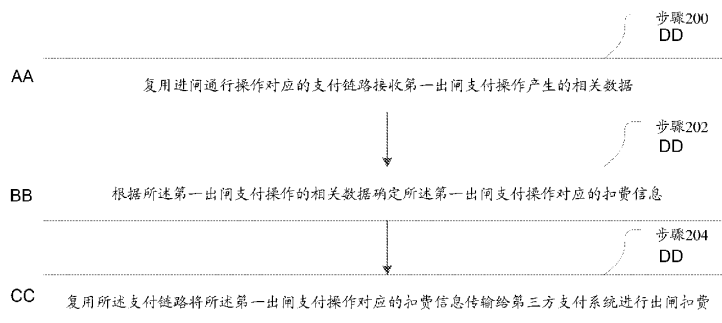

图 2

- AA Reuse a payment link corresponding to a gate-entering passage operation to receive relevant data generated by means of a first gate-exiting payment operation
- BB According to the relevant data of the first gate-exiting payment operation, determine fee deduction information corresponding to the first gate-exiting payment operation
- CC Reuse the payment link to transmit the fee deduction information corresponding to the first gate-exiting payment operation to a third-party payment system, so as to perform fee deduction upon a gate being exited
- DD Step

(57) Abstract: A method and system for realizing intercommunication between different payment operations. The method comprises: on the basis that a payment link is determined by means of a gate-entering passage operation, superimposing, onto the payment link, relevant data generated by means of a first gate-exiting payment operation which belongs to a type different from the type of the gate-entering passage operation (step 200); further determining fee deduction information (step 202); and then reusing the payment link to transmit the fee deduction information corresponding to the first gate-exiting payment operation to a third-party payment system, so as to perform fee deduction upon a gate being exited (step 204).

本国际公布:

— 包括国际检索报告 (条约第21条(3))。

(57) 摘要: 一种实现不同支付操作互通的方法及系统, 在进闸通行操作确定支付链路的基础上, 在该支付链路上叠加和进闸通行操作隶属不同类型的第一出闸支付操作产生的相关数据 (步骤200), 并进一步确定出扣费信息 (步骤202), 再复用该支付链路将第一出闸支付操作对应的扣费信息传输给第三方支付系统进行出闸扣费 (步骤204)。
