

ABSTRACT:

DEVICE AND METHOD FOR DRYING LAUNDRIES

It is a new home appliance that every household will need as our new generation flats are going higher and higher. This newly invented devise can be operated manually and electrically by mean of push button, remote control and even using telephone or hand phone when one is not at home and still can do house score, maybe when one is at work, shopping, in the market or lying in bed. Maids and housewives will be feeling easy and not stressfully when they need to do this house score. This devise can also save life, we heard that maid fall to their death when doing hanging out wet laundry, thus this devise will put employers at ease when their maid or housewife need to face danger hazard when they are hanging out wet laundries or keep laundries when there are heavy wind blowing.

You will be more convince to see how my devise works and see the sophistications of this appliance that takes no big space, it can be fitted in our homes, factories and even offices, it depend on how heavy duty one require, not just household item, it is also a commercial devise for particular industries.

In allowing me to prove my invention, I will sincerely wait for the delightful answer. Truthfully, this invented devise had wasted much times and efforts. Please assist to born it out and the whole world will be proud off that this devise make everyone feel so good. I call this devise:
"Kiano Laundry Hanger".
