(54) Title: DROP DETECTION SYSTEMS AND METHODS

(57) Abstract: A detection system (50) is configured to detect improper handling of a wearable visualization device (12). The detection system (50) includes a sensor (40) coupled to the wearable visualization device (12), a light emitter (42) coupled to the wearable visualization device (12), and a processor (54) configured to receive a signal from the sensor (40). The processor (54) is also configured to determine whether the signal indicates improper handling of the wearable visualization device (12), and to instruct illumination of the light emitter (42) in response to determining that the signal indicates improper handling of the wearable visualization device (12).
