

ABSTRACT

[Problem] To provide a web conferencing system that allows a shared material to be easily searched for and shared without disturbing the progress of the web conference.

5 [Solution] A web conferencing system 1 that connects a first terminal 3, a second terminal 5, and a third terminal 7, the web conferencing system 1 comprising: a web conference screen display unit 11 configured to display a web conference screen on the first terminal 3 and the third
10 terminal 7; and a material sharing unit 13 configured to: receive a sharing instruction to share a shared material from the second terminal 5; cause the first terminal and the third terminal to share the shared material.
