- (54) **Title:** MOBILE SOLUTION FOR IMPORTING AND SIGNING THIRD-PARTY ELECTRONIC SIGNATURE DOCUMENTS

**Fig. 1**

- (57) **Abstract:** Techniques for signer-initiated electronic document signing via an electronic signature service using a mobile or other client device are described. Example embodiments provide an electronic signature service ("ESS") configured to facilitate the creation, storage, and management of documents and corresponding electronic signatures. In some embodiments, when a signer user receives a hard copy (e.g., paper) signature document, the signer may capture an image of the signature document with a camera of a mobile device. The signer can then import the captured image into the ESS for signature, storage, and/or transmission to other parties.
