

ABSTRACT OF THE DISCLOSURE**AN IMPROVED STRUCTURE OF A CUBICLE BATHROOM AND A METHOD OF
FABRICATING THE SAME**

An improved structure of a cubicle bathroom and a method of fabricating the same are disclosed. The cubicle bathroom is prefabricated prior to installation the unit at a specific site, and comprises (a) a concrete floor for mounting of a plurality of pipes from a shower, wash basin and a water closet pan outlet; (b) a plurality of wall panels enclosed said concrete walls vertically along the boundary of the concrete floor to enclose the said shower, water basin and the water closet pan; (c) a top cover, disposed on top of the wall panel, having an access panel being mounted thereon; and (d) a plurality of piping connectors disposed to the concrete floor for connection with water supplies to the bathroom
