

ABSTRACT

5 Embodiments of the present application allow a terminal device to determine a
transmission format via a non-scheduling means and implement license-free
transmission. Provided are a radio communication method, a terminal device, and a
network device. The method comprises: a terminal device determines a first
transmission format used for transmitting data to be transmitted; according to the first
10 transmission format, the terminal device transmits to a network device the data to be
transmitted.
