(54) Title: E-HAILING SERVICE

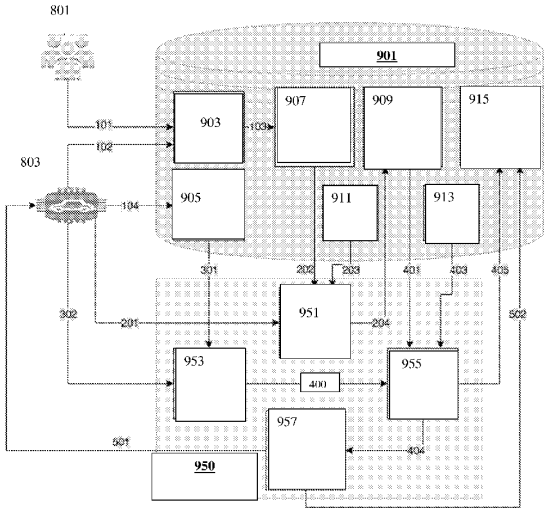

FIGURE 5

(57) Abstract: Example embodiments relate generally to methods, systems, and devices for managing service providers and service requests. The method includes, for each identified geographical area, deriving a service request forecast and service provider forecast for a particular upcoming time period. The method includes, for each identified geographical area, determining whether the geographical area will be in an over-supply state during the particular upcoming time period. The method includes, for each identified geographical area determined to be in the over-supply state during the particular upcoming time period: determining a quantity M of available service providers; selecting at least M available service providers in the geographical area; and providing a notification to only the selected available service providers. Each notification may include a message to move out of the geographical area and into a particular location in another geographical area.
