(54) Title: A METHOD FOR PRESENTING SITES USING THEIR SIMILARITY AND TRAVEL DURATION

FIG. 2

(57) Abstract: Embodiments determine indications of sites using their similarity and travel duration. One embodiment is a method that operates on real estate properties. The method receives destinations of commutes. In order to improve usability, the method determines a real estate property within a cluster of real estate properties that have similar features and that have proximate commute durations. Indications of at least one real estate property are presented to the user.
