(54) Title: DISAMBIGUATING AMBIGUOUS CHARACTERS

(57) Abstract: In one general sense, information may be presented to a user by receiving one or more ambiguous characters that may be resolved to one of at least two disambiguated characters, exchanging at least one of the ambiguous characters with a host, receiving, from the host, results that reflect disambiguated terms related to the ambiguous characters exchanged with the host, rendering the results in a manner enabling the user to perceive which of the disambiguated terms will be used upon user selection of an aspect of the results, and enabling the user to select an aspect of the results to effect use of a corresponding one of the disambiguated terms.
