(54) Title: SLICE INFORMATION FOR CELL SELECTION OR CELL RESELECTION

FIG. 1

(57) Abstract: Techniques are described to perform cell selection operation or cell reselection operation by using slice information. An example wireless communication method includes receiving, by a communication device, a slice information that indicates a configuration associated with one or more slices; and performing, by the communication device, a cell selection operation or a cell re-selection operation with a target cell that is determined by the communication device using the slice information.
