CONTAINER SKID TYPE FIRE EXTINGUISHING SYSTEM AND MANUFACTURING METHOD THEREOF

ABSTRACT

There is provided a method of manufacturing a container skid type fire extinguishing system that includes for assembling a plurality of storage containers packaged by storing a fire extinguishing agent in a plurality of container skids having an internal space, for assembling a control device for controlling the plurality of storage containers at least one of the plurality of container skids, and for preparing packaging and releasing by interconnecting the plurality of container skids. According to the present disclosure, the fire extinguishing system may be assembled in a correct posture by using the container skid which is capable of easily transporting the inside and outside of the ship, thereby contributing to the improvement of installation efficiency of the fire extinguishing system.
