

ABSTRACT OF THE DISCLOSURE
CULTIVATION SYSTEM ARRANGED ON CANAL

A cultivation system arranged on a canal includes: a conveying module arranged on the canal, the conveying module being configured to support a plurality of planting trays and capable of transporting the planting trays in one direction; and an irrigation module configured to carry water from the canal and/or a backup water supply device to the planting trays. The cultivation system can be used to cultivate vegetables, fruits, melons, ornamental plants or a combination thereof, and can also be used to breed fish.
