

ABSTRACT

This invention provides a composition for external use comprising an ascorbic acid compound. More preferably, provided is an ascorbic acid compound-containing composition for external
5 use in which precipitation under a low-temperature storage condition is suppressed.

The composition for external use comprises the following components:

- (A) at least one member selected from the group consisting of
10 ascorbic acid, derivatives thereof, and salts thereof;
- (B) an edetic acid salt;
- (C) a glycyrrhizic acid salt;
- (D) a heparinoid; and
- (E) water.
