ABSTRACT

DRUM TYPE WASHING MACHINE

5 A drum type washing machine includes water tub 19;
cylindrical rotary drum 17 rotatably installed in water tub
19 such that a central axis of rotation of rotary drum 17 is
horizontal or slanted; water outlet 31 provided on a bottom
portion of water tub 19; motor 21 for rotating rotary drum
10 17; water supplying unit 34 for supplying wash water into
water tub 19; water draining unit 33 for draining the wash
water from water tub 19; and controller 38 for controlling
motor 21, water supplying unit 34 and water draining unit 33
to thereby perform a washing, a rinsing and a water-
15 extracting process. Guiding member 45 with guiding surface
46 is installed on an inner bottom portion of water tub 19
to facilitate collection of the wash water and guide the
collected wash water toward water outlet 31 during the
water-extracting process.
