

ABSTRACT

A control method, a control apparatus, a readable storage medium and a cooking device, which relate to the technical field of cooking devices. The control method is applied to a cooking device (100). The cooking device (100) comprises a cooking cavity (1022), and an image sensor (104) is provided in the cooking cavity (1022). The control method comprises: collecting image data in the cooking cavity (1022) by means of the image sensor (104); sending the image data to a target server; the target server performing image processing on the image data to obtain a processed target image; and the target server performing data interaction with a target terminal, so as to allow the target terminal to acquire and display the target image. The cooking device of an embodiment of the present invention can actively upload image data during a cooking process, helping a user to remotely grasp the cooking progress of food being cooked; the user thus does not need to frequently go to the cooking device to confirm the cooking status, which improves cooking efficiency.
