

ACIDIC MILK BEVERAGE AND PRODUCTION METHOD FOR THE SAME

ABSTRACT

5

The present invention relates to a less viscous and more quaffable acidic milk beverage and a method for producing the same, in which phase separation and precipitation in an acidic milk beverage have been reduced while the acidic milk beverage comprises milk proteins including a high concentration of casein. More particularly, the present invention provides the acidic milk beverage of the present invention characterized by comprising 0.2 to 1.2% by weight of soybean polysaccharides, 0.1 to 0.5% by weight of HM pectin and 0.01 to 0.1% by weight of fibrous insoluble cellulose.
