(54) Title: CONNECTION SYSTEM FOR A MARINE DRILLING RISER

FIG. 2

(57) Abstract: The present invention concerns a connection system for a marine drilling riser (10) having one or more auxiliary lines (20), the connection system comprising: a moveable coupling member (30) having at least one first connector and at least one second connector coupled to the at least one first connector, wherein the at least one second connector is adapted for engaging with at least one connector of an auxiliary line of the marine drilling riser. The connection system further comprising: a control line support (18) for fixing at or adjacent an outer surface of the marine drilling riser; a control line supported by the control line support and for attachment to the moveable coupling member; and a tailing line for attachment to the moveable coupling member.
