

BRASSIERE

ABSTRACT OF THE DISCLOSURE

A brassiere comprises a pair of brassiere cups
5 (1) and a strap (2) for supporting the brassiere cups. A
pad (3) is fixedly held within each brassiere cup. Each
pad has a front panel (4) and a rear panel (5) being
secured together along the respective peripheral edges
thereof and forming a cavity (6). The cavity is partially
10 filled up with a liquid (7) which contains far infrared ray
emitting ceramic powders.
