DISPOSABLE DIAPER

162162

G00002

A B S T R A C T

A disposable diaper 1 includes a briefs-type cover component 2 having an elastic stretchability in vertical direction of the diaper 1, and an absorbent component 3 including topsheet 31 and backsheet 32 both being not elastically stretchable and a liquid-absorbent core 33 disposed therebetween. The absorbent component 3 is suspended inside the cover component 2 by suspender means 22A, 22B made of non-stretchable sheets and having pleats adapted to be flattened out in a vertical direction of the diaper 1.

Refer to Fig. 2.
