(54) Title: CONTAINER-CLOSURE ARRANGEMENT

(57) Abstract: A container-closure arrangement includes a container (10) having a base (13), a peripheral wall (15), a rim (16) forming an upper margin of the wall and surrounding an opening of the container, and a flange (19) formed integrally with and surrounding the wall below the level of the rim. A closure (11) has a central portion (25) that is arranged to overfit the opening of the container, and has a skirt (26, 29, 31) formed integrally with the central portion and arranged to surround and engage the rim (16) when the closure is fitted to the container. A part (34) of the skirt is adapted for being bonded to the flange (19), or a part (50) of the skirt can be push-fitted in an upwardly directed opening (52) in the flange (19), when the closure is fitted to the container.
