Abstract of the Disclosure

REPLACEABLE WEAR RUNNER

10 Replaceable wear runners are disclosed for
protecting a structure, such as a bucket, from
abrasive materials. Such wear runners include a
mounting base that is welded to the structure and a
replaceable wear cover. Apparatus for releasably
15 retaining the cover to the mounting base permits quick
and easy mounting and removal of the wear cover
without the use of special tools. The retaining
apparatus includes an arcuate retainer that is
slidably received into an arcuate slot accessible
through the top of the cover.
