(54) Title: A SYSTEM AND A METHOD FOR A MULTIPLE TRACK PROFILE WRAPPING MACHINE

(57) Abstract: Presented herein is a simple, innovative profile wrapping solution that increases the efficiency of single profile wrapping machines and drastically reduces set up time, by enabling the machine operator to set up a plurality of distinct profile tracks, wherein the set up procedure is facilitated by allowing the cylinder to rotate 90 degree to reposition the profile tracks perpendicularly in front of the operator, allowing easy access to the adjustment pins.
