(54) Title: CUTTER HEAD FOR DREDGING SOIL AND METHOD FOR DREDGING BY MEANS OF THIS CUTTER HEAD

(57) Abstract: The invention relates to a cutter head for dredging soil, which is mountable to the ladder (2) of a suction dredger (1) for dredging soil, and connectable on a suction pipe (4) for removing loosened soil, the cutter head (10) comprising a cage-shaped support construction (11) which is mountable to a drivable rotation shaft (14) extending mainly in extension of the ladder (2) and which has a circumferential surface provided with a number of cutting tools (20) for penetrating the soil (9), the cutting tools (20) comprising a number of disc-shaped penetration bodies (21) of which the disc planes extend substantially perpendicular to the rotation shaft (14), so that they can transfer forces to the soil (9) via their peripheral edges (22).
