(54) Title: MUSIC-BASED LANGUAGE-LEARNING METHOD, AND LEARNING DEVICE USING SAME

(54) 발명의 명칭: 음악기반 언어 학습방법과 이를 활용한 학습장치

[Fig. 3]

(57) Abstract: The present invention relates to a music-based language-learning method and to a learning device using same, and more particularly, to an audio-visual language-learning method and to a learning device using same. According to the method, user-customized multimedia learning content is generated and played to be listened to and watched, wherein music, which mainly consists of a song having lyrics and accompaniment, and language, which consists of text and the pronunciation thereof, are matched to a related image or video in the multimedia content. The music-based language-learning method according to the present invention comprises the steps of: selecting a previously stored musical accompaniment and a word/vocabulary or sentence using an input unit of a learning device; generating and storing music-based content for customized learning by matching the musical accompaniment and the word/vocabulary or sentence selected through the input unit to text, pronunciation by a native speaker, and a related image or video using a customized learning content generation unit; and reproducing the customized learning content using a control unit for outputting the text and the related image or video through a display unit and outputting the pronunciation of the native speaker and the musical accompaniment through a speaker.
