(54) Title: A DRIED OR FROZEN PHARMACEUTICAL PREPARATION CONTAINING A CLASS III ANTIARRHYTHMIC COMPOUND

(57) Abstract

The present invention relates to dried preparations containing a class III antiarriythmic compound in the form of crystalline or amorphous salt or any combination thereof, where the counterion is selected from pharmaceutically acceptable water–soluble organic or inorganic acids. The present invention also relates to frozen preparations containing a class III antiarrhythmic coumpound in the form of salt solution, where the counterion is selected from pharmaceutically acceptable water–soluble organic or inorganic acids. Preferred preparations contain a salt of the compound 3,7–diazabicyclo[3.3.1]–nonane–3–carboxylic acid, 7–[(2S)–3–(4–cyanophenoxy)–2–hydroxypropyl]–1,1–dimethylethyl ester (Compound A). Further aspects of the present invention include salts of Compound A *per se*, processes for preparing the preparation, as well as use of the preparations for prophylaxis and/or treatment of cardiac arrhythmia.
