ANTIBODY-DRUG CONJUGATE

Abstract

As an antitumor drug which is excellent in terms of antitumor effect and safety, there is provided an antibody-drug conjugate in which an antitumor compound represented by the following formula is conjugated to an antibody via a linker having a structure represented by the following formula: $-L^1-L^2-L^P-NH-(CH_2)n^1-L^a-L^b-L^c-$ wherein the antibody is connected to the terminal of L^1, and the antitumor compound is connected to the terminal of L^c with the nitrogen atom of the amino group at position 1 as a connecting position.
