(54) Title: USER EQUIPMENT AND BASE STATION INVOLVED IN TRANSMISSION OF DATA

Fig. 12

(57) Abstract: The present disclosure relates to a user equipment, UE, comprising the following. A processing circuitry of the UE generates data for transmission to a base station. The processing circuitry determines at least one of a plurality of uplink radio resources to be used by the UE for transmitting the data. A transmitter of the UE transmits the data to the base station using the determined at least one uplink radio resource. The processing circuitry determines at least one of the plurality of uplink radio resources not to be used by the UE for transmission. The transmitter transmits an unused-resource indication to the base station, indicating the determined at least one uplink radio resource that will not be used by the UE for transmission.
