(54) Title: COMPOSITION AND METHOD FOR STRIPPING ORGANIC COATINGS

(57) Abstract: The invention relates to a composition for stripping an organic coating from a substrate, which comprises about 5 wt% to about 90 wt% of a polar solvent, about 0.01wt% to about 50 wt% of an alkaline compound, and about 100 ppm to about 15 wt% of a metal corrosion inhibitor, based on the total weight of the composition. The composition of the invention can effectively remove the organic coating without damaging the surface of a metal substrate.
