(54) Title: HEATED SHAVING RAZORS

FIG. 1

(57) Abstract: A shaving razor cartridge with a housing having a guard, a cap, and one or more blades located between the guard and the cap. The guard is positioned in front of the one or more blades and the cap is positioned behind said one or more blades. A heating element (16) is mounted to the housing for transferring heat during a shaving stroke. The heating element includes a skin contacting surface (30) and an opposing bottom surface (34) defined by a perimeter wall (36). An insulating member (40) is positioned within the perimeter wall. The insulating member has a first surface (42) facing the bottom surface of the heating element and a second surface (44).
