

LIQUID FOOD PACKAGED IN CONTAINER FOR SEVERAL LIQUIDS

Abstract

The object of the present invention is to provide a food, in a liquid form packaged in a container, that is convenient, delicious, and made easy for regular consumption. The present invention provides a multi-liquid type liquid food, which includes (a) a liquid composition containing more than 70 wt.% of an oil and/or fat, and (b) a liquid composition, different from the liquid composition of (a) set forth above, having a viscosity from 1 to 2000 mPa·s. In the multi-liquid type liquid food, each of the liquid compositions is individually packaged.
