

ANCHORING KIT FOR A DRILLING MACHINE

ABSTRACT

5 The invention relates to an anchoring kit (100) for a drilling machine (10) provided with a frame (12), the anchoring kit including at least a first anchoring module (110) having:

 a first part (112) including an anchoring device (114) for immobilizing the first part in the soil;

10 a second part (116) including a device for fixing (118) to the frame (12);

 a displacement device (122) for moving the second part relative to the first part along a first direction (A).
