

ABSTRACT

The present invention is a liquid detergent composition for hard surfaces, which contains: (a) a copolymer containing a specific constituent unit (a1) having a betaine group, and a specific constituent unit (a2) having a cationic group, wherein a molar ratio between the constituent unit (a1) and the constituent unit (a2), constituent unit (a1)/constituent unit (a2), is 30/70 or more and 99.9/0.1 or less; (b) a cationic surfactant; and (c) one or more surfactants selected from amphoteric surfactants, nonionic surfactants and anionic surfactants.
